This course provides tools of project management. It offers the opportunity to give your work and project a good solid base to work from and deliver the outcomes you and your partners have set.

FEATURES

- A community-based approach to project management.
- Setting a goal and project framework that all stakeholders are signed up to delivering.
- Delivered by experienced trainers who use this approach in their day to day work.
- Provides an approach Sure Start and other community schemes use to develop a project plan that local stakeholders have participated in and who then own.

LEARNING OUTCOMES

- The Logical Framework for Project Management brings together a number of approaches to;
- goal setting
 - setting actions
 - assessing risks
 - basing itself on the participation of all stakeholders

WHO IS THE COURSE FOR?

This programme offers community groups, local authorities and their partners a chance to participate in a meaningful way in developing a project plan that sets out what the project will deliver, and how it will make the goal a reality.

OUTLINE PROGRAMME

- A four day programme which begins with clarifying the work, the remit and the key stakeholders; organising the workshop and ensuring that everyone and everything is in place for the two day workshop.
- A two day workshop setting the basic framework for the stakeholders and delivering the first step in a detailed project plan.
- Culminating in a written project plan, developed by the local stakeholders and compiled by your consultant and yourselves.
