

Transition In Life

Poem 268 by

LEON JORDAN

Consequences are very high prices
We all make transitions in life
Info is short for information
Transition is the next destination

War brings destruction and strife
In today's society we make transitions in life
With music we dance or sing
We all do transitioning

Sometimes knuckles crack
When transitioning, we can't go back
The opposite of bad is good
Transition is from birth to adulthood

Fire is hot
We think transitioning is bad but it's not
Life is a river, follow it's flow
All the negativity is in the past, transition and let go

Society is a mess
Transition is a learning process
A well known ape is named King Kong
We all have to make transitions and move on

When something is in the air it is rife
Transition is an important element of our society and life
