

...is one of the most significant publications concerned with services for people with learning disabilities in recent times. It is the only set of standards for Supported Living.

Published by Paradigm, Reach provides a clear definition of Supported Living together with a set of standards and best practice targets that can be applied to any service which is involved with Supported Living.

This second edition of Reach has been developed in partnership with the Valuing People Support Team, Association for Supported Living and Skills for People.

This new edition now includes:

- 11 standards – clearly defining what Supported Living is – updated and expanded from the first edition
- An easier to use process for people to determine if their service really is Supported Living, written in easy to understand English and tested by people with learning difficulties
- A read across to the National Minimum Standards for Domiciliary Care (as far as is possible)
- A read across to the Supporting People Quality Assessment Framework (as far as is possible)
- Video clips of good and bad Supported Living – helping people to think about their own service and how good it is
- An ability to export and analyse data, printing reports and other information for your own use, and to supplement information which is required by regulators

The new Reach pack contains:

- Reach – It's My Life Pack
- Reach – Service Review Pack
- Reach DVD

This all comes together in a sturdy folder and the whole pack should prove to be an invaluable resource for people involved with Supported Living.
